⚠ Dryers

Dehumidification- the inside story.

Air is drawn into the dehumidifier by means of a fan. The moisture is then condensed from the air and piped away, or collected by a container. The dry air is heated with the energy recovered during the drying phase and returned to the room. The process lowers the relative humidity of the air, increasing its capacity to absorb more moisture from surrounding surfaces. Condensation is avoided. Drying the air in a room enables plaster, cement or paint to dry out quicker without cracking. In fact the process is predictably faster than natural drying.

Portable fans which are suitable for large areas requiring air movement. Ideal in both industrial and commercial premises such as warehouses, leisure complexes, retail and open plan areas.

COMPACTON EQUIPMENT

Tandem Rollers

A range of light to medium duty tandem vibrating rollers designed to meet and exceed today's standards for compaction and performance, safety in use and operator comfort.

The 900 and 1200 are highly mobile, compact and easy to operate. They are ideal for use on a wide range of materials including granular sub bases and bituminous layers. Major applications include highway construction, parking areas and

estate roads.

Each model meets health and safety requirements having noise levels below 85 dB (A) plus emergency stop and twin braking systems.

900 1200

Weights 1500 kg 2600 kg

Centrifugal Force 10 kN 29 kN

Fuel Electric Start/Diesel

Pedestrian Roller

For small compaction jobs, pathways, sub floors, light hardcore, tarmac etc. This roller provides an ideal solution. Easily transportable with its own trailer.

LIGHT ACCESS

Staging Boards

Have a 600mm wide non-slip platform which can support up to 3 people evenly distributed. Must have at least 300mm overlap. A safe handrail system must be used above 2.0m high.

4.8m – Weight – 40kg

5.4m – Weight – 52kg

6.6m – Weight – 62kg

S.W.L. – 275kg / deck evenly distributed.

Folding Step up Platforms

Choice of 2 sizes of these platforms. Ideal for decorating or maintenance work. Light, easily erected and transported. Great DIY access platform. SWL – 250kg Weight –30kg

Trestles

2 Sizes. Used with planks or staging these trestles provide an adequate platform for most building applications.

Size 1 0.5m to 0.8m

Size 2 1.1m to 1.6m
